CELEBRITY NEWS

I want it to be image forward, so the center is still an image but articles are available on the right side depending on what's trending (is that possible to code in?) and then the left side are the latest articles -- but less busy than Elle's website, more image forward

Menu Options

On top in a row, options are: MUSIC, FASHION, CULTURE & ISSUES. I want this freeze framed no matter where you are on the page / articles so it's always on top. The logo part would be smaller. I like the socials being linked and also adding a contact/about the magazine tab next to it

Issue Pages

When you click on the issues tab, it takes you to all the covers (Issue 01, Issue 02, etc). Second image is what the flipbook would look like, with the other issues as options on the side

Neon Blue

LOGO NOTE

This is the ROUGH DRAFT! Will want a longer one to go on the top of the website but this is the general idea to include at bottom of page and stuff
